# Thematic blocks of the WCE

- Innovation + Entrepreneurship
  - Statistical analysis: Modelling of the relation between Gender, Innovation and Sustainable Development
  - Analysis of the strategic documents
  - Family policy vs. barriers to professional development
  - Feminization of poverty with the inclusion of time aspect
  - Gender budgeting
- ...

# 1) Innovation + Entrepreneurship

A survey on market and non-market innovativeness of women - Quantitative research on a micro level

Standard classification of innovation (including product, process, marketing, organizational and eco innovation)

A. Sen, J. Stiglitz, Fitoussi and G. Becker postulate to include the non-market sphere (housework and leisure) in the research of sustainable development and social welfare.

New expanded definition of women innovativeness which takes into account also the non-market sphere

## **2) Modelling of the relation between Gender, Innovation and Sustainable Development**

Comparative analysis of the BSR economies on macro level

Quantitative methods: linear and nonlinear econometric models of relations and dynamics models, classical methods of statistical analysis, chosen methods of spatial econometrics.

Time use variables involved to analyse non market activities and phenomena – data from HETUS - Harmonised European Time Use Survey.

# **3) Winnet Web Platform**

An intelligent tool making use of the latest information technology

Complementary to the academic and practical network

IT tool reaching some of the unused human resources e.g. as women who are economically inactive, yet innovative.

To exchange the knowledge and experience, improvement of the data management in the WCE and WRC network
